## PROFESSIONAL SUMMARY

Frontend engineer with 5 years of experience building performant, scalable, and user-centered web and mobile applications. Specialized in React, React Native, Next.js, TypeScript, and React Admin, with a track record of delivering financial platforms, admin dashboards, and data-driven systems. Strong testing practices (Jest, React Testing Library, Cypress, Playwright) and daily use of AI-assisted development tools to accelerate delivery without compromising code quality. Focused on clean code, performance optimization, and close collaboration with backend and product teams in Agile environments.

## EXPERIENCE

**Frontend Engineer — Dotone Holding** *Apr 2026 – Present*

*Venture: Postex (postex.ir)*

- Build and maintain React Native and Next.js applications for postex.ir, and ship additional products released on Cafe Bazaar (Iranian app store), including Shipito, Rahgiri, Postex, and SuperApp.

**Frontend Engineer — Wallex** *May 2024 – Mar 2026*

*Projects: Zeema.fund · Wallpay.info · Internal Admin Platforms*

- Built and maintained multiple financial and admin platforms, including Zeema.fund, Wallpay.info, and two internal React Admin dashboards.
- Developed the Zeema.fund investment platform using Next.js, TypeScript, and React Query, improving performance and API data synchronization.
- Implemented React Admin–based solutions for internal financial and compliance management systems with complex form logic and role-based access control.
- Enhanced data-fetching efficiency and UI responsiveness, achieving a 25% faster dashboard load time, while collaborating with backend engineers and product managers on API integrations.
- Maintained automated test coverage (Jest, React Testing Library, Cypress, Playwright) within CI/CD pipelines to ensure production-grade code quality.
- Integrated AI-assisted development tools (e.g., GitHub Copilot, Claude) into daily workflow to accelerate feature delivery and code review.

**Frontend Engineer — Atlasdadeh Sefid** *Apr 2023 – Apr 2024*

*mcpanel.adsefid.com*

- Developed a comprehensive user and admin panel for a B2B SMS platform using React, TypeScript, and TailwindCSS.
- Reduced data load times by 30% through dataset optimization and efficient rendering.
- Improved debugging-mode performance by 3 percentage points via WebSocket and API optimization.
- Integrated Sentry for real-time error monitoring, cutting issue-resolution time by 40%.

**Frontend Developer — Hidica** *Sep 2022 – Jan 2023*

- Led multiple projects using Next.js, TypeScript, Vue.js, React, and Storybook.
- Reduced average page load times by 25% through code optimization.
- Conducted code reviews and mentorship sessions, improving overall team code quality.
- Created reusable Storybook components, standardizing UI across projects.

**Frontend Developer — Reyton** *Jul 2021 – Jun 2022*

- Developed responsive, mobile-first websites using JavaScript, HTML, CSS, and Bootstrap, increasing mobile engagement by 20% and overall user satisfaction by 15%.
